Policy overview

Fidelity has established internal policies that seek to protect the preservation of an investor's capital in T-SWP while attempting to minimize the impact on the client of changes in monthly cash flow.

These policies include an automatic reset for distributing funds each December and monthly oversight.

The automatic reset for distribution funds each December is a result of year-end distributions being automatically reinvested in additional units of the fund. Due to the additional units, the aggregate monthly T-SWP cash flow received by each investor would be increased, unintentionally. To mitigate the impact of the year-end distributions on the cash flow, the monthly per unit T-SWP payment will be reduced by the same percentage as the year-end distribution, effective on the December 31 T-SWP pay date.

In addition, the annualized cash flows per unit of each series of each Fund will be compared to the tolerance range on a monthly basis, which may result in a rate reset during the year.

Read a fund's prospectus and consult your financial advisor before investing. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. Investors will pay management fees and expenses, may pay commissions or trailing commissions and may experience a gain or loss.
