■ WHAT DOES THE FUND INVEST IN?

The Fund invests primarily in underlying funds including other Fidelity Funds and ETFs. These underlying funds generally invest in equity securities, fixed income securities and/or money market instruments. From inception to its target date in 2050 and for a period of approximately twenty years thereafter, an increasing proportion of the Fund's assets will gradually be invested in securities of fixed income and money market funds. At the time the Fund's asset allocation is substantially similar to that of the Fidelity ClearPath® Income Portfolio, it is expected that the Fund will be combined with that portfolio.

The charts below give you a snapshot of the Fund's investments on September 30, 2024. The Fund's investments will change.

FUND FACTS

Fidelity ClearPath® 2050 Portfolio Series F

■ HOW RISKY IS IT?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING

Fidelity has rated the volatility of this Fund as **medium**.

This rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the 'What are the risks of investing in the fund?' section of the Fund's simplified prospectus.

NO GUARANTEES

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

■ HOW HAS THE FUND PERFORMED?

This section tells you how Series F units of the Fund have performed over the past 9 years. Returns are after expenses have been deducted. These expenses reduce the Fund's returns.

YEAR-BY-YEAR RETURNS

This chart shows how Series F units of the Fund performed in each of the past 9 years. The Fund dropped in value in 2 of the 9 years. The range of returns and change from year to year can help you assess how risky the Fund has been in the past. It does not tell you how the Fund will perform in the future.

BEST AND WORST 3-MONTH RETURNS

This table shows the best and worst returns for Series F units of the Fund in a 3-month period over the past 9 years. The best and worst 3-month returns could be higher or lower in the future. Consider how much of a loss you could afford to take in a short period of time.

	RETURN	3 MONTHS ENDING	IF YOU INVESTED \$1,000 AT THE BEGINNING OF THE PERIOD
Best return	14.4%	June 30, 2020	Your investment would rise to \$1,144
Worst return	-14.1%	March 31, 2020	Your investment would drop to \$859

AVERAGE RETURN

A person who invested \$1,000 in Series F units of the Fund 10 years ago now has \$2,378. This works out to an annual compound return of 9.0%.

■ WHO IS THIS FUND FOR?

Investors who:

- are planning to retire around 2050
- want to gain exposure to both equity and fixed income securities
- want the convenience of a diversified portfolio in a single fund
- can handle the volatility of returns generally associated with equity investments
- may be looking to benefit from combined management and administration fee distributions based on the amount of their investment in the Program

The Fund is not an appropriate investment if you have a short-term investment horizon.

■ A WORD ABOUT TAX

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan (RRSP) or a Tax-Free Savings Account (TFSA).

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

HOW MUCH DOES IT COST?

The following tables show the fees and expenses you could pay to buy, own and sell Series F units of the fund. The fees and expenses - including any commission - can vary among the series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

Series F units of the Fund are automatically included in the Program. The Program offers management and administration fee reductions, paid in the form of reinvested distributions ("fee distributions"), that increase progressively with assets, resulting in lower combined management and administration fees (before sales tax) than otherwise. We will automatically apply fee distributions on your Series F units of the Fund when you meet the applicable investment threshold. If you no longer meet the applicable investment threshold for a particular tier of fee distributions, we will automatically decrease the amount of the fee distributions to a lower tier, which will result in higher combined management and administration fees (before sales tax) but that will not exceed the Series F combined management and administration fees. See the fee distributions table under "Fund Expenses" below. For more details on the Program, see "Purchases, Switches and Redemptions" and "Fees and Expenses" in the Fund's simplified prospectus, and speak to your representative.

1 SALES CHARGES

You do not pay any sales charge when you buy or sell Series F units of the Fund.

2 FUND EXPENSES

You don't pay these expenses directly. They affect you because they reduce the return you get on your investment.

As of June 30, 2024, the Fund's expenses were 1.21% of its value. This equals \$12.10 for every \$1,000 invested.

Table with 2 columns: Expense Category, Annual Rate (AS A % OF THE FUND'S VALUE). Rows include Management expense ratio (MER) at 1.13%, Trading expense ratio (TER) at 0.08%, and FUND EXPENSES at 1.21%.

Table with 3 columns: Asset Level, Tier, Fee Distribution. Rows show fee distribution percentages for asset levels from \$0-\$249,999 to \$50,000,000+.

More about the trailing commission
Trailing commissions are not paid on Series F units.

3 OTHER FEES

You may have to pay other fees when you buy, hold, sell or switch units of the Fund.

Table with 2 columns: Fee, What You Pay. Rows include Short-term trading fee, Switch fee, Fee-for-service, and Advisor service fee.
