**This Fund is an alternative mutual fund. It has the ability to invest in asset classes or use investment strategies that are not permitted for conventional mutual funds. The specific strategies that differentiate this Fund from conventional mutual funds may include: increased use of derivatives for hedging and non-hedging purposes; increased ability to sell securities short; and the ability to borrow cash to use for investment purposes. If undertaken, these strategies will be used in accordance with the Fund's investment objectives and strategies, and these strategies may result in unlimited investment losses to the Fund as well as increased costs and expenses. Short selling specifically can result in unlimited investment losses and increased costs and expenses to the Fund, particularly during certain market conditions, including scenarios in which there are sudden price movements in securities, that may be outside of the control of the Fund Manager.**

**This Fund has obtained exemptive relief to permit it to engage in short selling strategies in excess of the short selling limits permitted under applicable securities legislation for both alternative mutual funds and conventional mutual funds. Consistent with the Fund's investment objectives, the Fund may engage in the short selling of securities and/or cash borrowing with a combined limit of 100% of its net asset value.**

## WHAT DOES THE FUND INVEST IN?

The Fund invests primarily in long and short positions of equity and fixed income securities of issuers anywhere in the world. The Fund can invest in these securities either directly or indirectly through investments in underlying funds. These underlying funds are alternative mutual funds. The Fund may use leverage through the use of short selling of up to 100% of its net asset value and by investing in derivatives.

The Fund's gross exposure is calculated as the sum of the following, and must not exceed 300% of its net asset value: (i) the aggregate market value of securities sold short; (ii) the value of indebtedness under any borrowing arrangements for investment purposes; and (iii) the aggregate notional value of the Fund's specified derivatives positions excluding any specified derivatives used for hedging purposes.

## HOW RISKY IS IT?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

### RISK RATING

Fidelity has rated the volatility of this Fund as **low to medium**.

Because this is a new Fund, the risk rating is only an estimate by Fidelity. Generally, the rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the 'What are the risks of investing in the fund?' section of the Fund's simplified prospectus.

### NO GUARANTEES

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

### ■ A WORD ABOUT TAX

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan (RRSP) or a Tax-Free Savings Account (TFSA).

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.

### ■ HOW MUCH DOES IT COST?

The following tables show the fees and expenses you could pay to buy, own and sell Series B units of the Fund. The fees and expenses - including any commissions - can vary among the series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

#### 1 SALES CHARGES

You may pay a sales charge when you buy Series B units of the Fund.

SALES CHARGE OPTION	WHAT YOU PAY WHEN YOU BUY YOUR UNITS

It goes to your representative's firm as a commission.</li></ul>

#### 2 FUND EXPENSES

You don't pay these expenses directly. They affect you because they reduce the return you get on your investment.

The Fund's expenses are made up of the management fee, fixed administration fee, and operating expenses and trading costs (fund costs). The series' annual management fee is 2.00% of the series' value. The series' annual fixed administration fee will fall under one of the three tiers below, depending on the amount of Fund assets:

Under \$100 Million	0.165%	
\$100 Million - \$ 1 Billion	0.155%	
Over \$ 1 Billion	0.145%	

#### More about the trailing commission

The trailing commission is an ongoing commission. Fidelity pays a trailing commission to all dealers, including discount brokers, for as long as you own the Fund. This is for services and advice that your representative and their firm provide to you. When these commissions are paid to discount brokers, they are for services and any tools or other assistance that your discount broker may offer.

The trailing commission is paid from the Fund's management fee and is based on the value of your investment.
