HOW RISKY IS IT?

The value of the Fund can go down as well as up. You could lose money.

One way to gauge risk is to look at how much a fund's returns change over time. This is called "volatility".

In general, funds with higher volatility will have returns that change more over time. They typically have a greater chance of losing money and may have a greater chance of higher returns. Funds with lower volatility tend to have returns that change less over time. They typically have lower returns and may have a lower chance of losing money.

RISK RATING

Fidelity has rated the volatility of this Fund as **medium**.

This rating is based on how much the Fund's returns have changed from year to year. It doesn't tell you how volatile the Fund will be in the future. The rating can change over time. A fund with a low risk rating can still lose money.

For more information about the risk rating and specific risks that can affect the Fund's returns, see the 'What are the risks of investing in the fund?' section of the Fund's simplified prospectus.

NO GUARANTEES

Like most mutual funds, this Fund doesn't have any guarantees. You may not get back the amount of money you invest.

FUND FACTS

Fidelity Canadian Large Cap Class Series F

■ HOW HAS THE FUND PERFORMED?

This section tells you how Series F shares of the Fund have performed over the past 10 years. Returns are after expenses have been deducted. These expenses reduce the Fund's returns.

YEAR-BY-YEAR RETURNS

This chart shows how Series F shares of the Fund performed in each of the past 10 years. The Fund did not drop in value in any of the 10 years. The range of returns and change from year to year can help you assess how risky the Fund has been in the past. It does not tell you how the Fund will perform in the future.

■ WHO IS THIS FUND FOR?

Investors who:

- plan to hold their investment for the medium- to long-term
- want to gain Canadian and foreign equity exposure
- can handle the volatility of returns generally associated with equity investments
- may be looking to benefit from combined management and administration fee rebates based on the amount of their investment in the Program

The Fund is not an appropriate investment if you have a short-term investment horizon.

Registered plan investors should be aware that the Fund may, from time to time, bear an income tax expense which will reduce returns.

■ HOW MUCH DOES IT COST?

The following tables show the fees and expenses you could pay to buy, own and sell Series F shares of the fund. The fees and expenses - including any commission - can vary among the series of a fund and among funds. Higher commissions can influence representatives to recommend one investment over another. Ask about other funds and investments that may be suitable for you at a lower cost.

Series F shares of the Fund are automatically included in the Program. The Program offers management and administration fee reductions, paid in the form of reinvested distributions ("fee rebates"), that increase progressively with assets, resulting in lower combined management and administration fees (before sales tax) than otherwise. We will automatically apply fee rebates on your Series F shares of the Fund when you meet the applicable investment threshold. If you no longer meet the applicable investment threshold for a particular tier of fee rebates, we will automatically decrease the amount of the fee rebates to a lower tier, which will result in higher combined management and administration fees (before sales tax) but that will not exceed the Series F combined management and administration fees. See the fee rebates table under "Fund Expenses" below. For more details on the Program, see "Purchases, Switches and Redemptions" and "Fees and Expenses" in the Fund's simplified prospectus, and speak to your representative.

1 SALES CHARGES

You do not pay any sales charge when you buy or sell Series F shares of the Fund.

BEST AND WORST 3-MONTH RETURNS

Best return	21.6%	January 31, 2021	Your investment would rise to \$1,216
Worst return	-11.3%	March 31, 2020	Your investment would drop to \$887

AVERAGE RETURN

A person who invested \$1,000 in Series F shares of the Fund 10 years ago now has \$2,536. This works out to an annual compound return of 9.8%.

■ A WORD ABOUT TAX

In general, you'll have to pay income tax on any money you make on a fund. How much you pay depends on the tax laws where you live and whether or not you hold the fund in a registered plan, such as a Registered Retirement Savings Plan (RRSP) or a Tax-Free Savings Account (TFSA).

Keep in mind that if you hold your fund in a non-registered account, fund distributions are included in your taxable income, whether you get them in cash or have them reinvested.
