- 1 A fund's volatility is determined using a statistical measure called "standard deviation. Standard deviation is a statistical measure of how much a return varies over an extended period of time. The more variable the returns, the larger the standard deviation. Investors may examine historical standard deviation in conjunction with historical returns to decide whether an investment's volatility would have been acceptable given the returns it would have produced. A higher standard deviation indicates a wider dispersion of past returns and thus greater historical volatility. Standard deviation does not indicate how an investment actually performed, but it does indicate the volatility of its returns over time. Standard deviation is annualized. The returns used for this calculation are not load-adjusted. Standard deviation does not predict the future volatility of a fund. The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of the fund. Standard deviation is used to quantify the historical dispersion of returns around the average returns over a recent ten-year period.
- 2 The compound growth calculations shown is used to illustrate the effects of the compound growth rate and is not intended to reflect future values of the fund or returns on investment in any fund.
- 3 Effective July 23, 2024, Series B and F of Fidelity Advantage Ether ETF Fund<sup>®</sup> (ETF Fund), which invests directly in FETH, reduced its management fee from 0.90% to 0.89% (Series B) and from 0.40% to 0.39% (Series F), respectively. In addition, FETH reduced some of the expenses that would be reflected in the ETF Fund's management expense ratio (MER). As a result, the MER for Series B and F will be lower going forward and is estimated to be 1.12% (Series B) and 0.54% (Series F), respectively (inclusive of HST), on an annualized basis. The total expenses of the ETF Fund, including the management fee, fixed administration fee, HST, portfolio transaction costs and expenses, will be reflected in the ETF Fund's management report of fund performance, posted semi-annually.
- 4 Fidelity Advantage Ether ETF<sup>®</sup> aims to invest in ether. Fidelity Advantage Ether ETF Fund<sup>®</sup> invests in Fidelity Advantage Ether ETF<sup>®</sup>. These funds do not speculate with regards to short-term changes in ether prices. Given the speculative nature of ether and the volatility of the ether market, there is considerable risk that these funds will not be able to meet their investment objectives. An investment in these funds is not intended as a complete investment program and is appropriate only for investors who have the capacity to absorb a loss of some or all of their investment. An investment in these funds is considered high risk.

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the mutual fund or ETF's prospectus, which contains detailed investment information, before investing. The indicated rates of return are historical annual compounded total returns for the period indicated including changes in unit value and reinvestment of distributions. The indicated rates of return do not take into account sales, redemption, distribution or option charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds and ETFs are not guaranteed. Their values change frequently, and investors may experience a gain or a loss. Past performance may not be repeated.
