## PERFORMANCE (SERIES F) – US\$

AS AT MARCH 31, 2024

### Standard period returns

	FUND
1 month	4.45
3 month	12.42
6 month	25.78
1 year	32.26
Since inception	34.54

### Calendar year performance

### Risk classification

A fund's volatility is determined using a statistical measure called "standard deviation. Standard deviation is a statistical measure of how much a return varies over an extended period of time. The more variable the returns, the larger the standard deviation. Investors may examine historical standard deviation in conjunction with historical returns to decide whether an investment's volatility would have been acceptable given the returns it would have produced. A higher standard deviation indicates a wider dispersion of past returns and thus greater historical volatility. Standard deviation does not indicate how an investment actually performed, but it does indicate the volatility of its returns over time. Standard deviation is annualized. The returns used for this calculation are not load-adjusted. Standard deviation does not predict the future volatility of a fund.

The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of the fund. Standard deviation is used to quantify the historical dispersion of returns around the average returns over a recent ten-year period.

Please note that investment performance and NAVPU are reported in U.S. dollars. Fund aggregate assets are reported in Canadian dollars.

Read a fund's prospectus before investing. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. Investors will pay management fees and expenses, may pay commissions or trailing commissions and may experience a gain or loss. The indicated rates of return are the historical annual compounded total returns including changes in unit value and the reinvestment of all distributions and do not take into account sales, redemption, distribution, optional charges or income taxes payable by any security holder that would have reduced returns. If you buy other series of Fidelity funds, the performance will vary largely due to different fees and expenses. Investors who buy Series F pay investment management fees and expenses to Fidelity. Investors will also pay their dealer a fee for financial advice services in addition to the Series F fees charged by Fidelity.

## QUARTERLY TOP TEN HOLDINGS

AS AT DECEMBER 31, 2023

United Kingdom	4.5
France	3.6
Italy	3.6
Germany	3.4
Denmark	3.3
Belgium	1.9
Japan	1.7
Spain	1.2

## Fund strategy

- A high-conviction portfolio of typically 40–80 small cap companies anywhere in the world.
- Looks for mispriced investment opportunities where the market has under-reacted to positive change or over-reacted to negative change.
- Invests in a vast but less efficient part of the market with greater potential for active return.

## Fund facts

### Portfolio managers

Connor Gordon  
Chris Maludzinski

### Series inception date

September 28, 2022

### NAV - Series F

US\$11.37 (as at March 31, 2024)
