Since inception	21.07

Calendar year performance

Risk classification

A fund's volatility is determined using a statistical measure called "standard deviation. Standard deviation is a statistical measure of how much a return varies over an extended period of time. The more variable the returns, the larger the standard deviation. Investors may examine historical standard deviation in conjunction with historical returns to decide whether an investment's volatility would have been acceptable given the returns it would have produced. A higher standard deviation indicates a wider dispersion of past returns and thus greater historical volatility. Standard deviation does not indicate how an investment actually performed, but it does indicate the volatility of its returns over time. Standard deviation is annualized. The returns used for this calculation are not load-adjusted. Standard deviation does not predict the future volatility of a fund.

The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of the fund. Standard deviation is used to quantify the historical dispersion of returns around the average returns over a recent ten-year period.

Fund strategy

- A high-conviction portfolio of typically 40–80 small cap companies anywhere in the world.
- Looks for mispriced investment opportunities where the market has under-reacted to positive change or over-reacted to negative change.
- Invests in a vast but less efficient part of the market with greater potential for active return.

Fund facts

Portfolio managers

Chris Maludzinski
Connor Gordon

Fund inception date

September 28, 2022

NAV - Series B

US\$11.75 (as at March 31, 2025)

Aggregate assets (all series)

\$3.8 billion
(as at February 28, 2025)

Management expense ratio – Series B

2.28%, as at September 30, 2024

1 Month-end asset mixes may total greater than/less than 100% due to differences in the timing of cashflows and investments, and/or to reflect cash held for the purposes of collateral allocations associated with certain types of derivatives. Country and sector allocations show specific exposures to countries/sectors representing at least 1% of total fund asset. As such, the values displayed may not total 100%. ■ 2 Fidelity Global Small Cap Fund was merged into Fidelity Global Small Cap Opportunities Fund on September 6, 2024.
