Fidelity Global Asset Allocation Currency Neutral Private Pool

- The Pool uses derivatives to mitigate exposure to changes in exchange rates between developed market currencies and the Canadian dollar. The investment approach used by the Pool, while effective in reducing exchange rate risk, will not completely eliminate the impact of currency fluctuations. The Pool's returns will differ from the local currency returns of its underlying investments.
- The Pool will generally have an asset mix with the following ranges: 25-65% equity securities, 35-75% fixed-income and money market securities.
- Within these ranges, the portfolio managers make active allocation decisions focused on downside risk mitigation with asymmetric bands, allowing greater flexibility to reduce equity risk when conditions warrant. This means that based on the neutral equity weighting of 50%, the portfolio manager may overweight equities by up to 15% and underweight them by up to 25%; based on the neutral fixed-income mix of 50%, the portfolio manager may overweight fixed income by up to 25% and underweight it by up to 15%.
- The portfolio managers may change or reallocate the Pool's investments at any time.

Pool management

- Portfolio managers are Geoff Stein and David Wolf.
- In making active asset allocation decisions, the portfolio managers use economic and bottom-up fundamental market inputs and extensive global macro research.

- 1 Management fees do not include administration and other operating expenses and applicable sales tax. Fees are shown in basis points. Note that fee reductions are applicable only on that portion of assets that fall within the specified tier.
- 2 The Pool invests its assets in units of Fidelity Global Asset Allocation Private Pool, Series O. Holdings information shown on this page represents the Pool's exposure to the holdings of Fidelity Global Asset Allocation Private Pool.
- 3 The blended index is 50% MSCI AC World Index Hedged CAD, 40% Bloomberg Global Aggregate Bond Index Hedged CAD and 10% FTSE Canada 91-Day T-Bill Index.
- 4 A fund's volatility is determined using a statistical measure called "standard deviation. Standard deviation is a statistical measure of how much a return varies over an extended period of time. The more variable the returns, the larger the standard deviation. Investors may examine historical standard deviation in conjunction with historical returns to decide whether an investment's volatility would have been acceptable given the returns it would have produced. A higher standard deviation indicates a wider dispersion of past returns and thus greater historical volatility. Standard deviation does not indicate how an investment actually performed, but it does indicate the volatility of its returns over time. Standard deviation is annualized. The returns used for this calculation are not load-adjusted. Standard deviation does not predict the future volatility of a fund. The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of the fund. Standard deviation is used to quantify the historical dispersion of returns around the average returns over a recent ten-year period.

Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus, which contains detailed investment information, before investing. The indicated rates of return are historical annual compounded total returns for the period indicated including changes in unit value and reinvestment of distributions. The indicated rates of return do not take into account sales, redemption, distribution or option charges or income taxes payable by any unitholder that would have reduced returns. Mutual funds are not guaranteed. Their values change frequently. Past performance may not be repeated. © 2022 Fidelity Investments Canada ULC. All rights reserved.
