Annual Management Report of Fund Performance June 30, 2024

### **Caution Regarding Forward-looking Statements**

Certain portions of this report, including, but not limited to, "Results of Operations" and "Recent Developments", may contain forward-looking statements about the Fund, including its strategy, risks, expected performance and condition. Forward-looking statements include statements that are predictive in nature, that depend upon or refer to future events or conditions, or that include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" and similar forward-looking expressions or negative versions thereof.

In addition, any statement that may be made concerning future performance, strategies or prospects, and possible future Fund action, is also a forward-looking statement. Forward-looking statements are based on current expectations and projections about future events and are inherently subject to, among other things, risks, uncertainties and assumptions about the Fund and economic factors. Accordingly, assumptions concerning future economic and other factors may prove to be incorrect at a future date.

Forward-looking statements are not guarantees of future performance, and actual events and results could differ materially from those expressed or implied in any forward-looking statements made by the Fund. Any number of important factors could contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition, technological change, changes in government regulations, unexpected judicial or regulatory proceedings, and catastrophic events.

It should be stressed that the above-mentioned list of important factors is not exhaustive. You are encouraged to consider these and other factors carefully before making any investment decisions and you are urged to avoid placing undue reliance on forward-looking statements. Further, you should be aware of the fact that the Fund has no specific intention of updating any forward-looking statements whether as a result of new information, future events or otherwise, prior to the release of the next Management Report of Fund Performance.

### **Management Discussion of Fund Performance**

### **Investment Objective and Strategies**

Investment Objective: Fidelity Global Growth Portfolio (Fund) aims to achieve a high total investment return and is geared toward capital growth. The Fund invests primarily in underlying funds. These underlying funds will generally invest in global equity securities and/or fixed income securities.

Strategies: Fidelity Global Growth Portfolio uses an asset allocation strategy and invests primarily in underlying funds, including other Fidelity Funds and exchange-traded funds (ETFs).

The Fund is managed in accordance with its targeted asset mix, which includes underlying funds that generally invest in global equity and/or fixed income securities. The Fund may invest in underlying funds that invest in any kind of equity or fixed income security. The portfolio management team can determine the asset class to which a fund or security belongs based on its investment characteristics. The portfolio management team may also invest the Fund's assets in underlying funds that invest in other securities that don't fall within these classes. The portfolio managers may change the underlying funds invested in, or the percentage of the Fund's assets invested in a particular underlying fund, and third -tier fund at any time.

The Fund's neutral mix is 85% equity securities and 15% fixed income securities and money market instruments. Depending on market conditions, the portfolio managers may vary the Fund's asset mix by up to +/-15% from the neutral mix if they believe this will produce the best overall return. The Fund may also invest a portion of its assets in securities of ETFs and may hold cash. Underlying Fidelity funds may invest in securities of other funds, including ETFs.

### Risk

The risks associated with investing in this Fund remain as discussed in the prospectus. Any changes to the Fund over the period have not affected the overall level of risk of the Fund.

The Fund is suitable for medium- to long-term investors who want to gain exposure to both global equity and fixed income securities, want the convenience of a diversified portfolio in a single fund, and can handle the volatility of returns generally associated with equity investments. The Fund is not an appropriate investment for investors with a short-term investment horizon. To invest in the Fund, investors should be willing to accept a low to medium level of risk. The suitability of the investment has not changed from what has been disclosed in the prospectus.

### **Results of Operations**

Fidelity Global Growth Portfolio, Series B, returned 21.7%, after fees and expenses, for the year ended June 30, 2024. The net returns of the other series of the Fund are similar to those of Series B, except for differences attributable to expense structures. During the review period, Global Equities, as represented by the MSCI World Index, returned 24.3% (in Canadian dollar terms) and Global Fixed Income, as represented by the Bloomberg Global Aggregate Bond Index, returned 4.4% (in Canadian dollar terms).

#### Market overview:

Global equities, as broadly measured by the MSCI World Index, returned 24.3% in Canadian dollar terms and 20.2% in U.S. dollar terms, for the one-year period ended June 30, 2024.

Global equities rose during the review period. A resilient economy and investors' optimistic sentiment towards rate cuts supported expectations for a soft landing in the global economy. Recent artificial intelligence developments within the communication services and information technology sectors also contributed to global gains. While inflation decelerated in developed markets, it remained well above the target range of most developed market central banks. Against this global backdrop, equity markets in the U.S., Japan, and Europe were volatile but ultimately advanced during the period under review. In Europe, robust corporate earnings and decelerating inflation supported investor confidence. The European Central Bank (ECB) also approved its first interest rate reduction since 2019 and cut the interest rates by 25 basis points to 3.75% in June 2024. Japanese equities rose, as a broad range of policy measures reflected in higher economic growth, increased wages and an apparent end to Japan's deflationary era, as well as the weakness in the yen, which supports Japanese exporters. Emerging markets also ended higher but lagged developed markets amid concerns about the outlook for China's economy, despite a modest recovery in growth and supportive policy measures announced by the People's Bank of China.

Global investment-grade bonds, as broadly represented by the Bloomberg Global Aggregate Bond Index, returned 4.4% in Canadian dollar terms and 0.9% in U.S. dollar terms, for the one-year period ended June 30, 2024.

Global investment-grade bonds advanced in Canadian and U.S. dollar terms over the period under review. High yield bonds outperformed investment-grade, benefitting from higher yields and tighter credit spreads in both U.S. and European fixed income markets. Government bond yields adjusted in response to a shift in macroeconomic indicators, and geopolitical tensions continued to weigh on investors' sentiment. Expectations of an early interest rate cut were scaled back as inflation remained a central concern across developed economies. The U.S. Federal Reserve (the Fed) maintained its benchmark interest rates, the Fed Funds rate, in the target range of 5.25%-5.50% after increasing rates by 25 basis points in July 2023. In the U.S., annual headline inflation continued to ease to 3.3% in May 2024, while in Europe, the harmonized index of consumer prices fell from an annual rate of 5.3% in July 2023 to 2.4% in April 2024. This prompted the ECB to announce its first interest rate reduction since 2019, as it cut the interest rates by 25 basis points to 3.75% in June 2024. However, in the U.S., the Fed maintained its policy rate, as inflation remained elevated beyond its 2% target. Elsewhere, the Bank of Japan ended its negative interest rate policy and enacted the first rate increase in 17 years, raising the interest rate from -0.1% to a range of 0%-0.1%, in March 2024. In contrast, investors remained concerned about the economic outlook, despite signs of recovery in the first guarter of 2024 and the People's Bank of China's supportive policy measures to stimulate the economy hit by prolonged real estate crisis and rising unemployment.

### Fidelity Global Growth Portfolio Management Discussion of Fund Performance – continued

#### Factors affecting performance:

The Fund's benchmark returned 17.1% for the period under review. The Fund's benchmark is composed of 30.0% S&P/TSX Capped Composite Index, 55.0% MSCI ACWI (All Country World Index) ex Canada Index, 10.0% Bloomberg Global Aggregate Bond Index and 5.0% FTSE Canada Universe Bond Index.

The Fund outperformed its benchmark, primarily due to investments in U.S. equities. A lower-than-benchmark allocation to, and investments in, Canadian equities also contributed to relative returns. In addition, investments in emerging markets equities contributed to relative returns. No asset class among equities materially detracted from relative returns over the review period. In fixed income, lower-than-benchmark allocations to global investment-grade bonds and Canadian investment-grade bonds contributed to relative returns. In contrast, out-of-benchmark allocations to U.S. long-term Treasury bonds and U.S. investment-grade bonds detracted from relative returns.

### Portfolio changes:

During the review period, the portfolio managers increased exposure to equities in the U.S. and developed international markets, where they believe the investment landscape to be more attractive. In contrast, exposure to Canadian and emerging market equities was reduced, in favour of investments in other areas of the market. In fixed income, the portfolio managers initiated a position in Canadian investment-grade bonds and increased exposure to U.S. long-term Treasury bonds, owing to what the portfolio managers believed to be more attractive risk/reward opportunities, while exposure to global investment-grade bonds was decreased. Exposure to commodities was also reduced during the review period.

The Fund is one of a suite of nine multi-asset class portfolios designed to offer investors a diversified investment option in a single product. The Fund's targeted neutral mix is 85% equity investments and 15% fixed income investments. The portfolio managers are responsible for portfolio design, construction and ongoing monitoring and management. The Fund is monitored and actively managed on a daily basis.

#### Derivatives disclosure:

During the period, the Fund engaged in equity futures contracts in a manner consistent with its investment objective and strategies, to effectively change its exposure to various equities without the need to buy into or sell out of strategic positions.

### **Recent Developments**

Portfolio managers David Wolf and David Tulk observe that economic activity remains robust within developed markets, despite some early signs of slowing due to tighter financial conditions. However, Canada has shown anemic growth. Although the effects of heightened productivity may not be immediately discernible, advancements in artificial intelligence, coupled with the ongoing prevalence of remote work arrangements, have likely contributed to productivity gains, in the portfolio managers' view. With headline inflation continuing to moderate, the portfolio managers note that that central banks may not feel the need to maintain such stringent monetary policy. We have already seen Europe and Canada take the first step in cutting their policy interest rates. The portfolio managers note that a debate remains on how many interest rate cuts will happen, and when, but the direction of monetary policy is likely to be towards loosening. Against this backdrop, the portfolio managers have become more constructive, but continue to hold certain allocations that may provide some defense in a multi-asset portfolio. The traditional method of holding bonds for diversification remains unreliable with the correlation between stocks and bonds continuing to be positive. In their view, constructing portfolios that are well-diversified across asset classes, styles and regions is the right way to both protect and grow capital over the long run.

Effective September 19, 2023, Anne Bell of Mississauga, Ontario, became a member of the Independent Review Committee (IRC).

### **Related Party Transactions**

### **Manager and Portfolio Adviser**

The Fund is managed by Fidelity Investments Canada ULC (Fidelity). Fidelity is part of a broader collection of companies collectively known as Fidelity Investments.

Fidelity provides or arranges for the provision of all general management and administrative services required by the Fund in its day-to-day operations, bookkeeping, record-keeping and other administrative services for the Fund.

Fidelity is the portfolio adviser to the Fund and it provides investment advisory services to the Fund. Fidelity has entered into sub-advisory agreements with a number of entities, including Fidelity Management & Research Company LLC. With respect to the Fund, Fidelity Management & Research Company LLC has entered into a further sub-advisory agreement with Fidelity Management & Research (Canada) ULC to provide investment advice with respect to all or a portion of the investments of the Fund. The sub-advisors arrange for acquisition and disposition of portfolio investments, including all necessary brokerage arrangements. The Fund pays Fidelity a monthly management and advisory fee for their services, based on the net asset value of each Series, calculated daily and payable monthly. The Fund paid Fidelity management and advisory fees of \$95,867,000 for the period ended June 30, 2024.

#### **Administration Fee**

Fidelity charges the Fund a fixed administration fee in place of certain variable expenses. Fidelity, in turn, pays all of the operating expenses of the Fund, other than certain specified fund costs (e.g. the fees and expenses of the Independent Review Committee, taxes, brokerage commissions and interest charges). The Fund pays an annual rate, which is calculated on a tiered basis, based on the net asset value of each Series, calculated daily and payable monthly. The Fund paid Fidelity administration fees of \$10,471,000 for the period ended June 30, 2024.

#### **Brokerage Commissions**

The Fund may place a portion of its portfolio transactions with brokerage firms which are affiliates of Fidelity, provided it determines that these affiliates' trade execution abilities and costs are comparable to those of non-affiliated, qualified brokerage firms, on an execution-only basis. Commissions paid to brokerage firms that are affiliates of Fidelity Investments were less than \$500 for the period ended June 30, 2024. Fidelity receives standing instructions from the IRC in respect of policies and procedures governing best execution of transactions with affiliates, which includes brokers affiliated to Fidelity Investments, at least once per year.

#### Independent Review Committee, Cross-Trading and In specie Transactions

#### **Independent Review Committee**

Fidelity has established an independent review committee (IRC) that acts as an impartial and independent committee to review and provide recommendations or, if appropriate, approvals respecting conflict of interest matters referred to it by Fidelity. The IRC prepares, at least annually, a report of its activities for securityholders of the Fund. The report is available at www.fidelity.ca or at the securityholder's request at no cost by contacting Fidelity, using the contact information available on the final page of this document.

### **Cross-Trading and In specie Transactions**

The Fund received the approval and standing instructions from the IRC in order to:

(i) engage in cross-trading, which is a form of interfund trading. A cross-trade occurs when the Fund purchases or sells portfolio securities from or to another Fund, a U.S. fund or a separately managed account, through a broker;

(ii) permit the Fund, in certain circumstances, to purchase and redeem Fund securities in consideration for securities rather than cash of another investment fund not governed by NI 81-102, or a separately managed account, managed by Fidelity.

For each of the transactions in (i) and (ii) above, the IRC's standing instructions require Fidelity to act in accordance with its associated policies and procedures and applicable law, and comply with the conditions in each of the exemptive relief orders received, which, in the case of cross-trading, requires additional periodic reporting to the Ontario Securities Commission. The standing instructions also require that investment decisions in respect of these transactions (a) are free from any influence by an entity related to Fidelity and without taking into account any consideration relevant to an entity related to Fidelity; (b) represent the business judgment of Fidelity uninfluenced by considerations other than the best interests of the Fund; (c) comply with the applicable policies and procedures of Fidelity; and (d) achieve a fair and reasonable result for the Fund.

### **Financial Highlights Footnotes**

- \* This information is derived from the Fund's audited annual and/or unaudited interim financial statements. The net assets attributable to securityholders per security presented in the financial statements may differ from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to financial statements.
- <sup>B</sup> Net assets and distributions are based on the actual number of securities outstanding at the relevant time. The increase (decrease) from operations is based on the weighted average number of securities outstanding over the financial period. This table is not intended to be a reconciliation of beginning to ending net assets per security.
- C Distributions were paid in cash or reinvested in additional securities of the Fund, or both, and excludes any applicable distributions of management fee reduction to securityholders. Distributions are presented based on management's best estimate of the tax character.
- <sup>D</sup> This information is provided as at period end of the year shown.
- E Prior period amounts may have been adjusted.
- <sup>F</sup> Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset values during the period, including the Fund's pro-rata share of estimated expenses incurred in any underlying investment fund, if applicable, (2024: .01%, 2023: .01%, 2022: .01%, 2020: .02%).
- <sup>6</sup> Effective November 1, 2014, the manager of the Fund has waived a portion of its administration fee and as of the date of the MRFP has continued to provide the Fund with such waivers. The manager may terminate the waiver at any time, at its sole discretion. It is not known when such waivers will be terminated.
- <sup>H</sup> The trading expense ratio represents total commissions, other portfolio transaction costs and dividends and interest expense on securities sold short expressed as an annualized percentage of daily average net asset value during the period, including the Fund's pro-rata share of estimated trading costs incurred in any underlying investment fund, if applicable.
- <sup>1</sup> The Fund's portfolio turnover rate indicates how actively the Fund's portfolio adviser manages its portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a year, the greater the trading costs payable by the Fund in the year, and the greater chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high portfolio turnover rate and the performance of the Fund. The portfolio turnover rate is calculated based on the lesser of purchases or sales of securities divided by the weighted average market value of portfolio securities owned by the Fund, excluding short-term securities. The portfolio turnover rate is nonuclized. The portfolio turnover rate excludes any adjustment for in-kind transactions.
- <sup>1</sup> Effective October 1, 2015, the manager of the Fund has waived a portion of its administration fee and as of the date of the MRFP has continued to provide the Fund with such waivers. The manager may terminate the waiver at any time, at its sole discretion. It is not known when such waivers will be terminated.
- K For the period June 6, 2024 (commencement of sale of securities) to June 30, 2024.
- <sup>1</sup> Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset values during the period, including the Fund's pro-rata share of estimated expenses incurred in any underlying investment fund, if applicable.
- M Effective June 6, 2024, the manager of the Fund has waived a portion of its administration fee and as of the date of the MRFP has continued to provide the Fund with such waivers. The manager may terminate the waiver at any time, at its sole discretion. It is not known when such waivers will be terminated.
- N For the period June 1, 2022 (commencement of sale of securities) to June 30, 2022.
- <sup>0</sup> Management expense ratio is based on total expenses (excluding distributions, commissions and other portfolio transaction costs) for the stated period and is expressed as an annualized percentage of daily average net asset values during the period, including the Fund's pro-rata share of estimated expenses incurred in any underlying investment fund, if applicable, (2024: .01%, 2023: .01%).

### **Management and Advisory Fees**

Fidelity serves as manager and investment advisor of the Fund. The Fund pays Fidelity a monthly management and advisory fee for its services, based on the net asset value of each Series, calculated daily and payable monthly. Fidelity uses these management fees to pay for sales and trailing commissions to registered dealers on the distribution of the Fund securities, as well as for the general investment management expenses. Dealer compensation represents cash commissions paid by Fidelity to registered dealers during the period and includes upfront deferred sales charge and trailing commissions. This amount may, in certain circumstances, exceed 100% of the fees earned by Fidelity during the period. For new Funds or Series the amounts presented may not be indicative of longer term operating periods.

### Fidelity Global Growth Portfolio Past Performance

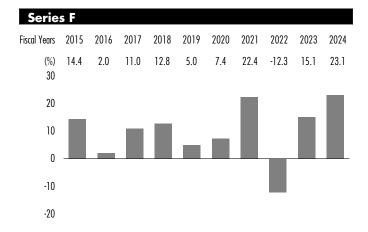

The performance information shown assumes that all distributions made by the Fund in the periods shown were reinvested in additional securities of the Fund. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. How the Fund has performed in the past does not necessarily indicate how it will perform in the future.

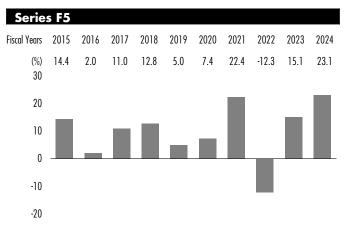

#### Year-by-Year Returns

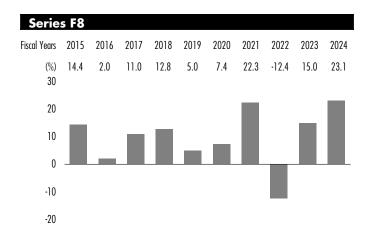

The following bar chart shows the Fund's annual performance for each of the years shown, and illustrates how the Fund's performance was changed from year to year. In percentage terms, the bar chart shows how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

A discussion of Fund performance can be found in the Results of Operations section of this report.

The Fund's benchmark is a combination of approximately 30.0% S&P/TSX Capped Composite Index, 55.0% MSCI ACWI (All Country World Index) ex Canada Index, 10.0% Bloomberg Global Aggregate Bond Index and 5.0% FTSE Canada Universe Bond Index.

The MSCI World Index is a market capitalization weighted index composed of companies representative of the market structure of Developed Market countries in North America, Europe and the Asia/Pacific Region.

The S&P/TSX Composite Index is an index of stocks that are generally considered to represent the Canadian equity market. The S&P/TSX Capped Composite Index is the same as the S&P/TSX Composite index except that it is adjusted quarterly so that no single stock has a relative weight in the index greater than 10.0%.

The MSCI ACWI (All Country World Index) ex Canada Index is an unmanaged, free float - adjusted market capitalization weighted index composed of stocks of companies located in countries throughout the world except Canada. It is designed to measure equity market performance in global developed and emerging markets excluding Canada.

The Bloomberg Global Aggregate Bond Index covers the most liquid portion of the global investment grade fixed - rate bond market, including government, credit and collateralized securities.

On August 24, 2016, Bloomberg purchased the Barclays family of benchmark indices. As part of this transaction, all Barclays benchmark indices have been co-branded as the Bloomberg Barclays Indices for an initial period of 5 years. Effective August 24, 2021 the Bloomberg Barclays fixed income benchmark indices were rebranded as the Bloomberg Indices. This change occurred as planned at the end of the five-year period following Bloomberg's acquisition of Barclays Risk Analytics and Index Solutions (BRAIS) in August of 2016.

The FTSE Canada Universe Bond Index is a broad measure of the Canadian investment - grade fixed - income market, consisting of Government of Canada, provincial, corporate and municipal bonds issued domestically in Canada and denominated in Canadian dollars.

Effective April 12, 2019, the FTSE TMX Canada indices were renamed as FTSE Canada indices as a result of FTSE Russell's acquisition of FTSE TMX Global Debt Capital Markets Limited. Each Series will have different returns because of differences in management fees and expenses.

If the fund invests in another fund managed by Fidelity, which in turn invests more than 10% of its net assets in any third-tier fund also managed by Fidelity, the Top Issuers table would include a pro-rata look-through into the assets held by the third tier fund. This amount will be disclosed if it meets the criteria to be included in the Top Issuers table.

Where applicable, the information in the above tables includes the Fund's pro-rata share of the investment in any Fidelity managed underlying fund.

All tables within the Summary of Investment Portfolio section, except the Top Issuers table, contain audited annual information.

The summary of investment portfolio may change due to ongoing portfolio transactions of the investment fund. Fidelity's mutual funds are sold by registered Investment Professionals. Each Fund has a simplified prospectus, which contains important information on the Fund, including its investment objective, purchase options, and applicable charges. Please obtain a copy of the prospectus, read it carefully, and consult your Investment Professional before investing. As with any investment, there are risks to investing in mutual funds. There is no assurance that any Fund will achieve its investment objective, and its net asset value, yield, and investment return will fluctuate from time to time with market conditions. Investors may experience a gain or loss when they sell their securities in any Fidelity Fund. Fidelity Global Funds may be more volatile than other Fidelity Funds as they concentrate investments in one sector and in fewer issuers; no single Fund is intended to be a complete diversified investment program. Past performance is no assurance or indicator of future returns. There is no assurance that either Fidelity Canadian Money Market Fund, Fidelity Canadian Money Market Investment Trust, Fidelity U.S. Money Market Investment Trust will be able to maintain its net asset value at a constant amount. The breakdown of Fund investments is presented to illustrate the way in which a Fund may invest, and may not be representative of a Fund's current or future investments. A Fund's investments may change at any time.
