

Fidelity Tax-Smart Solutions[®]

What happens when my adjusted cost base (ACB) hits zero?

Through Tax-Smart CashFlow, Fidelity offers investors tax-efficient monthly cash flow from non-registered investments. The tax efficiency comes mainly from a high proportion of return of capital included in the monthly distribution. Return of capital is not taxable to an investor because the non-registered investment was originally purchased with after-tax dollars. It does, however, reduce the adjusted cost base (ACB) of the investment.

The ACB is a measure that tracks the cost of an investment over time. It is used to determine an investor's capital gain at the time of sale.

Can an investor's ACB reach zero?

Yes. Return of capital paid to an investor is subtracted from the ACB. When an investor receives return of capital payments for an extended period, the ACB will eventually decline to zero.

What are the tax consequences of reaching zero ACB?

When the ACB reaches zero, and another return of capital payment causes it to fall below zero, the amount of the negative balance is automatically deemed to be a capital gain realized by the investor in the current tax year. A portion of this capital gain is taxable.¹ The ACB is then increased by this deemed capital gain to bring the ACB back to zero, where it remains until another return of capital payment is made, and the cycle repeats.

How will deemed capital gains be reported to investors?

Fidelity will notify investors annually by letter about all return of capital payments that caused their ACB in a particular fund to fall below zero. This letter will be based on information Fidelity has on record, and should be reviewed with a tax professional to determine the appropriate course of action.

What is ACB?

ACB represents the cost of an investment that can be *adjusted* over time for various actions, such as

- additional investments, including switched in from other funds (+)
- reinvested distributions (+)
- sales charges (-)
- management fee rebates (+)
- return of capital through cash distributions (-)
- redemptions and switches-out to other funds (-)

2024 Federal Budget announced an increase in the capital gains inclusion rate from one half to two thirds for corporations and trusts, and from one half to two thirds on the portion of capital gains realized in the year that exceed \$250,000 for individuals, for capital gains realized on or after June 25, 2024. The capital gains inclusion rate will remain at one half for individuals under \$250,000. Subsequently, it was announced that the implementation date was deferred to January 1, 2026.

My ACB has reached zero. What are my options?

- 1. Do nothing.** You can continue to enjoy regular monthly cash flow from the investment. All that has changed is the tax status of the monthly payment, from return of capital (tax-free) to a capital gain, which is still advantageous from a tax perspective, because only a portion¹ of the gain is taxable.
- 2. Switch to a non-Tax-Smart CashFlow series of the same fund on a tax-deferred basis.** If you can do without the regular monthly cash flow, the investment can be switched to a different (non-Tax-Smart CashFlow) series of the same fund without triggering a capital gain.
- 3. Switch to a different fund.** A change can be made for any reason that suits your financial strategy. However, this decision will trigger a capital gain for tax purposes. Issues about taxation of investments can be complex, and Fidelity recommends that you consult your financial advisor before making any decisions.

- 4. Initiate charitable donation strategy.** Charitable giving with Tax-Smart CashFlow allows you to receive tax-deferred cash flow payments from your investments and donate to a worthy cause in a tax efficient way.

Example

Note: The example below has been simplified for informational purposes and should not be relied upon for any other purpose.

Investor A invested \$5,000 for 500 units of a Series 8% Tax-Smart CashFlow fund on January 1, Year 1. Annual Tax-Smart CashFlow payments are estimated to be $\$5,000 \times 8\% = \400 (\$33.33 monthly). No additional purchases or redemptions are made subsequently, aside from the annual reinvestment of year-end distributions. **The following summarizes the activity from January 1, Year 1, until October 31, Year 13:**

DATES	ACTIVITY (\$CDN)		UNITS
January 1, Year 1	Initial investment	\$5,000	500
Year 0	Total return of capital	(\$400)	–
December, Year 1	Year-end distribution – reinvested	\$10	1
Year 1	Total return of capital	(\$400)	–
December, Year 2	Year-end distribution – reinvested	\$10	1
Year 2	Total return of capital	(\$400)	–
December, Year 3	Year-end distribution – reinvested	\$10	1
Year 3	Total return of capital	(\$400)	–
December, Year 4	Year-end distribution – reinvested	\$0	–
Year 4	Total return of capital	(\$400)	–
December, Year 5	Year-end distribution – reinvested	\$0	–
Year 5	Total return of capital	(\$400)	–
December, Year 6	Year-end distribution – reinvested	\$20	2
Year 6	Total return of capital	(\$400)	–
December, Year 7	Year-end distribution – reinvested	\$10	1
Year 7	Total return of capital	(\$400)	–
December, Year 8	Year-end distribution – reinvested	\$10	1
Year 8	Total return of capital	(\$400)	–
December, Year 9	Year-end distribution – reinvested	\$0	–
Year 9	Total return of capital	(\$400)	–
December, Year 10	Year-end distribution – reinvested	\$0	–
Year 10	Total return of capital	(\$400)	–
December, Year 11	Year-end distribution – reinvested	\$10	1
Year 11	Total return of capital	(\$400)	–
December, Year 12	Year-end distribution – reinvested	\$10	1
December 31, Year 12	Investor A's ACB	\$290	259

During Year 13, Investor A continues to receive \$33.33 of return of capital each month as follows:

DATES	ACTIVITY (\$CDN)		ACB \$CDN	UNITS
December 31, Year 12	Investor A's ACB	\$290	\$290.00	259
Year 13				
January 31	Monthly return of capital	(\$33.33)	\$256.67	–
February 28	Monthly return of capital	(\$33.33)	\$223.34	–
March 31	Monthly return of capital	(\$33.33)	\$190.01	–
April 30	Monthly return of capital	(\$33.33)	\$156.68	–
May 31	Monthly return of capital	(\$33.33)	\$123.35	–
June 30	Monthly return of capital	(\$33.33)	\$90.02	–
July 31	Monthly return of capital	(\$33.33)	\$56.69	–
August 31	Monthly return of capital	(\$33.33)	\$23.36	–
September 30	Monthly return of capital	(\$33.33)	(\$9.97)	–
September 30, Year 13	Deemed capital gain	\$9.97	–	259

On September 30, Year 13, the ACB of Investor A falls below zero as a result of the monthly Tax-Smart CashFlow payment. Immediately, there is a deemed disposition for tax purposes, and the negative ACB is treated as a capital gain. This capital gain is added to the ACB of Investor A to bring the ACB back to zero.

Following this, the October distribution will trigger an additional capital gain of \$33.33, and the ACB will remain at zero.

Questions about Fidelity Tax-Smart CashFlow[®]

¹ 2024 Federal Budget announced an increase in the capital gains inclusion rate from one half to two thirds for corporations and trusts, and from one half to two thirds on the portion of capital gains realized in the year that exceed \$250,000 for individuals, for capital gains realized on or after June 25, 2024. The capital gains inclusion rate will remain at one half for individuals under \$250,000. Subsequently, it was announced that the implementation date was deferred to January 1, 2026.

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the mutual fund's or ETF's prospectus, which contains detailed investment information, before investing. Mutual funds and ETFs are not guaranteed. Their values change frequently, and investors may experience a gain or a loss. Past performance may not be repeated.

A return of capital reduces an investor's adjusted cost base. Capital gains taxes are deferred until units are sold or until the ACB goes below zero. Investors should not confuse this cash flow distribution with a fund's rate of return or yield. While investors in Fidelity's tax-efficient series (Tax-Smart CashFlow) will be able to defer some personal capital gains, they must still pay tax on capital gains distributions that arise from the sale of individual holdings by fund managers, and on interest and dividend distributions. Tax-Smart CashFlow will also pay a year-end distribution that must be reinvested in additional securities of the applicable fund. The monthly cash-flow distributions on Tax-Smart CashFlow are not guaranteed, will be adjusted from time to time and may include income.
