

A core fixed income holding that aims to provide a steady flow of income and the potential for capital appreciation.

Harnessing the strength and reach of Fidelity's global fixed income teams, the Fund has the flexibility to invest in a wide range of fixed income securities to adjust to changing market conditions.

Flexibility to target a wide range of investment-grade bonds

For illustrative purposes only*

Why Fidelity Investment Grade Total Bond Fund?

- A core fixed income holding designed for discretionary managed portfolios.
- Leverages Fidelity's deep research resources, proprietary credit rating system and unique approach of collaborating across both fixed income and equity research teams.
- Combines Fidelity's top-down asset allocation and bottom-up security selection expertise with the aim of mitigating downside risk and identifying opportunities.
- Provides exposure to the broad opportunity set available in the U.S. fixed income market, with the flexibility to invest around the world as global market conditions change.

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the mutual fund's or ETF's prospectus, which contains detailed investment information, before investing. Mutual funds and ETFs are not guaranteed. Their values change frequently, and investors may experience a gain or a loss. Past performance may not be repeated.

The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of a fund or those of a reference index, in the case of a new fund.

Currency neutrals funds use derivatives to mitigate the fund's exposure to changes in exchange rates between developed market currencies and the Canadian dollar. The investment approach used by the funds, while effective in reducing exchange rate risk, will not completely eliminate the impact of currency fluctuations. The funds' returns will differ from the local currency returns of its underlying funds.
