Why Fidelity Multi-Sector Bond Fund?

INVESTMENT FLEXIBILITY

With access to the full opportunity set of fixed-income sectors, the portfolio managers seek to deliver attractive total returns by leveraging Fidelity's top-down asset allocation expertise with bottom-up security selection.

TACTICAL MANAGEMENT

The portfolio managers can utilize a variety of tactical tools to drive returns, including asset allocation, sector rotation, security selection, yield curve positioning and foreign currency exposures.

A DISCIPLINED RISK-MANAGEMENT FRAMEWORK

The Fund employs a disciplined investment process that seeks to deliver strong risk-adjusted returns while mitigating a range of key fixed-income risks, such as interest-rate risk, credit risk, and liquidity risk.

PORTFOLIO DIVERSIFICATION

The Fund can be added to an existing core allocation as a complement to traditional fixed income or as an alternative for portfolio diversification through its low correlation to equities.

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the mutual fund or ETF's prospectus, which contains detailed investment information, before investing. Mutual funds and ETFs are not guaranteed. Their values change frequently, and investors may experience a gain or a loss. Past performance may not be repeated.

The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of a fund or those of a reference index, in the case of a new fund.

Currency neutrals funds use derivatives to mitigate the fund's exposure to changes in exchange rates between developed market currencies and the Canadian dollar. The investment approach used by the funds, while effective in reducing exchange rate risk, will not completely eliminate the impact of currency fluctuations. The funds' returns will differ from the local currency returns of its underlying funds.
