

Fidelity Global Innovators[®] Strategy seeks long-term capital appreciation while investing primarily in equity securities of companies located anywhere in the world that have the potential to be disruptive innovators. The Strategy seeks to identify companies that are positioned to benefit from the application of innovative and emerging technology or that employ innovative business models.

Strategy overview

A flexible investment strategy focused on innovative and disruptive companies in today's rapidly changing world.

For illustrative purposes only.

Why this Strategy?

Focused on disruptive innovation globally

A flexible investment strategy focused on innovative and disruptive companies in today's rapidly changing world.

Global investment network

Combining the strength of Fidelity's global research platform by seeking to invest in compelling opportunities across the globe.

Looking for positive change

Focusing on situations in which the market is underreacting to positive changes or overreacting to negative ones, creating an opportunity to earn excess returns over the long term.

Mark Schmehl

Portfolio Manager

Joined Fidelity in 1999

- 1 As of July 2, 2021, the Fund was closed to new investors. The Fund will remain available to existing investors, including: (i) those with systematic purchase and exchange programs; and (ii) new purchases by any discretionary client account managed by a portfolio manager licensed to engage in discretionary trading on behalf of its clients where the Fund is already held within the discretionary model portfolio or asset allocation program or other similar investment product prior to July 2, 2021. Your dealer or advisor must notify us whether your account qualifies under (ii) above in order for us to process the purchase into the Fund. Fidelity has made this decision in order to preserve the integrity of the Fund.
- 2 Deferred sales charge options (DSC/LL/LL2) are no longer available for new purchases as of the close of business on May 31, 2022.
- 3 DSC – Deferred sales charge; LL – Low Load; LL2 – Low Load 2; ISC – Initial sales charge; NL – No Load.

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the mutual fund or ETF's prospectus, which contains detailed investment information, before investing. Mutual funds and ETFs are not guaranteed. Their values change frequently, and investors may experience a gain or a loss. Past performance may not be repeated.

Unlike traditional mutual fund series, exchange-traded series (ETF series) are traded on stock exchanges. In the event of a disruption or a halt in trading of the ETF series on a stock exchange or marketplace on which the ETF series of a fund are traded, the trading price of the ETF series may be affected. As a result, the disruption or halting of such trading may cause a performance variance between the ETF series and the traditional mutual fund series because the ETF series may trade in the market at a premium or discount to the net asset value (NAV) per unit. There can be no assurance that the ETF series trading price will behave similar to the NAV per unit. The trading price of the ETF series will fluctuate in accordance with changes in a fund's NAV, as well as market supply and demand on the exchange or marketplace on which the ETF series are traded. As such, the performance between the ETF series and the traditional mutual fund series of a fund may vary. In addition, there are other factors that could lead to performance variances between the ETF series and the traditional mutual fund series, such as, for example, brokerage commissions and HST.

A return of capital reduces an investor's adjusted cost base. Capital gains taxes are deferred until units are sold or until the ACB goes below zero. Investors should not confuse this cash flow distribution with a fund's rate of return or yield. While investors in Fidelity's tax-efficient series (Tax-Smart CashFlow) will be able to defer some personal capital gains, they must still pay tax on capital gains distributions that arise from the sale of individual holdings by fund managers, and on interest and dividend distributions. Tax-Smart CashFlow will also pay a year-end distribution that must be reinvested in additional securities of the applicable fund. The monthly cash-flow distributions on Tax-Smart CashFlow are not guaranteed, will be adjusted from time to time and may include income.

Currency neutrals funds use derivatives to mitigate the fund's exposure to changes in exchange rates between developed market currencies and the Canadian dollar. The investment approach used by the funds, while effective in reducing exchange rate risk, will not completely eliminate the impact of currency fluctuations. The funds' returns will differ from the local currency returns of its underlying funds.

The NASDAQ Composite Index is the market capitalization-weighted index of approximately 3,000 common equities listed on the NASDAQ Stock Exchange. The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of a fund or those of a reference index, in the case of a new fund.
