

Uncovering value by aiming to identify high-quality companies that are mispriced

Looking beyond large caps?

Global small cap stocks can play an important role in a well-diversified portfolio, because they potentially blend some of the best attributes of their smaller and larger counterparts.

Why this Fund?

We've used our robust research capabilities aiming to identify high-quality global small-cap stocks, distinguished by our stock-picking capabilities.

Quality

Focus on **high-quality companies** with the potential to grow and **compound earnings power** over a multi-year period.

Change

Emphasis on situations where the **market under-reacts to positive change or over-reacts to negative change**; resulting in an opportunity for excess returns.

Mispricing

Identify companies trading at a **discount to long-term earnings power/intrinsic value**.

Focused on two general types of mispricing

Growth at a reasonable price	Value + Catalyst
A high-quality business with the ability to grow, reinvest, or compound capital at a high rate of return for a long period of time.	An underperforming business with a catalyst for improvement.
<p>Mispricing:</p> <p>The market underestimates the magnitude and/or duration of earnings growth.</p>	<p>Mispricing:</p> <p>The market underestimates the improvement in normalized earnings, growth and/or risk profile.</p>

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the mutual fund's or ETF's prospectus, which contains detailed investment information, before investing. Mutual funds and ETFs are not guaranteed. Their values change frequently, and investors may experience a gain or a loss. Past performance may not be repeated.

An ETF is an investment fund that is traded on a stock exchange like individual stocks. ETF series is a class of securities offered by a conventional mutual fund that is distributed pursuant to a simplified prospectus and ETF Facts. However, unlike traditional mutual fund series, the ETF series are listed on a stock exchange like an ETF. Traditional mutual funds series are bought and sold through registered dealers. The ETF series may generally only be subscribed for or purchased directly from the mutual fund by authorized dealers or designated brokers. Investors will be able to buy or sell ETF series on a stock exchange or marketplace through registered brokers and dealers in the province or territory where the investor resides.

The MSCI ACWI Small Cap Index captures small cap representation across 23 Developed Markets (DM) and 24 Emerging Markets (EM) countries. With 6,374 constituents, the Index covers about 14% of the free float-adjusted market capitalization in each country.

The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of a fund or those of a reference index, in the case of a new fund. The indicated rates of return are the historical annual compounded total returns including changes in unit value and the reinvestment of all distributions and do not take into account sales, redemption, distribution, optional charges or income taxes payable by any security holder that would have reduced returns.
