

## Mark Schmehl: Introducing Fidelity Global Innovators Class

Mark Schmehl, Portfolio Manager

00:00:05

Innovation is a global commodity. It happens all over the world, whether it's Shanghai, Tel Aviv, somewhere in Europe, a garage in Africa. Innovation can happen anywhere. And the nice thing about this new fund is, I can go after it. I can find it through the Fidelity resource bucket, and I can go and own it. I can own small caps, mid caps, large caps, I can go private. I have a ton of opportunity to broaden the sort of net to hunt for innovation and find the best innovations all over the world and put that stuff in the Global Innovators Class.

Read a fund's prospectus and consult your financial advisor before investing. Mutual funds are not guaranteed; their values change frequently and past performance may not be repeated. Investors will pay management fees and expenses, may pay commissions or trailing commissions, and may experience a gain or loss.

Views expressed regarding a particular company, security, industry or market sector are the views only of that individual as of the time expressed and do not necessarily represent the views of Fidelity or any other person in the Fidelity organization. Such views are subject to change at any time based upon markets and other conditions and Fidelity disclaims any responsibility to update such views. These views may not be relied on as investment advice and, because investment decisions for a Fidelity fund are based on numerous factors, may not be relied on as an indication of trading intent on behalf of any Fidelity fund.

Certain statements in this commentary may contain forward-looking statements ("FLS") that are predictive in nature and may include words such as "expects", "anticipates", "intends", "plans", "believes", "estimates" and similar forward-looking expressions or negative versions thereof. FLS are based on current expectations and projections about future general economic, political and relevant market factors, such as interest and foreign exchange rates, equity and capital markets, and the general business environment, in each case assuming no changes to applicable tax or other laws or government regulation. Expectations and projections about future events are inherently subject to, among other things, risks and uncertainties, some of which may be unforeseeable and, accordingly, may prove to be incorrect at a future date. FLS are not guarantees of future performance, and actual events could differ materially from those expressed or implied in any FLS. A number of important factors can contribute to these digressions, including, but not limited to, general economic, political and market factors in North America and internationally, interest and foreign exchange rates, global equity and capital markets, business competition and catastrophic events. You should avoid placing any undue reliance on FLS. Further, there is no specific intention of updating any FLS whether as a result of new information, future events or otherwise.
