

FIDELITY All-in-One ETFs

Voiceover:

We live in a world where vehicles are driverless.

Amazing, isn't it?

We also live in a world where your investments can be driverless too.

Not so amazing.

You see, if you're investing using the cheapest products you can find, or you're thinking about it, give this some thought. The reason the fees might be so low is because no one's got their hands on the wheel, keeping your investment goals on track.

That's where we come in.

Introducing Fidelity All-in-One ETFs. Now with crypto.

A simple suite of lower-cost solutions for you and your hard-earned money. With a strategically diversified combination of Fidelity Factors under the hood, these all-in-one ETFs provide a kind of financial GPS to help keep you and your investments on the right course.

And while every investment cycle has its speed bumps, there's less need to worry, because your money is annually rebalanced. It's also rebalanced if the neutral mix drifts by a certain amount. In other words, we do all the work. You enjoy the ride.

It gets even better. There's a Fidelity All-in-One ETF for different types of investors and they're our first all-in-one ETF portfolios with between 1% to 10% exposure to a bitcoin ETF.

There's our Fidelity All-in-One Conservative ETF. A fund with a higher focus on fixed income for those who have a lower risk profile, while looking to realize modest growth.

Our Fidelity All-in-One Balanced ETF is a balanced approach, with a focus on equities and fixed income for those looking to achieve a more robust growth profile.

If you're looking for a growth strategy with a higher focus on equities, there's Fidelity All-in-One Growth ETF. And finally...

...our All-in-One Equity ETF, with the strongest commitment to equities.

There you have it: a suite of lower-cost, simple investment solutions designed to suit different kinds of investors across different kinds of markets.

Fidelity All-in-One ETFs.

Another way Fidelity helps you get ahead and stay ahead.

Commissions, trailing commissions, management fees, brokerage fees and expenses may be associated with investments in mutual funds and ETFs. Please read the mutual fund or ETF's prospectus, which contains detailed investment information, before investing. Fidelity's All-in-One ETFs pay indirect management fees through their investments in underlying Fidelity ETFs that pay management fees and incur trading expenses (in addition to the indirect management fee, the Fidelity ETFs will also pay indirectly the operating expenses of the underlying Fidelity ETFs). Mutual funds and ETFs are not guaranteed. Their values change frequently, and investors may experience a gain or a loss. Past performance may not be repeated.

While the ETFs are typically managed to the neutral mix constraints indicated, the ETFs may deviate from it. Please read the ETF's prospectus, which contains detailed investment information.

Management fees are incurred indirectly through the ETFs' investments in underlying Fidelity ETFs. Actual effective, indirect management fees will change based on the performance of each underlying Fidelity ETF within the ETFs and rebalancing events initiated by the sub-advisor. Actual indirect management fees will be reflected in the management expense ratio (in addition to applicable taxes and expenses) of each ETF, posted semi-annually.

The investment risk level indicated is required to be determined in accordance with the Canadian Securities Administrators standardized risk classification methodology, which is based on the historical volatility of a fund, as measured by the ten-year annualized standard deviation of the returns of a fund or those of a reference index, in the case of a new fund.
